SUPRESS®
SOUND-ENGINEERED PRODUCTS

Tired of noisy walls, floors, and ceilings? Supress® them!

As people live more closely together, sound and noise become annoyances. Supress Sound-Engineered Products® are the solutions to quieter environments. Whether you are building or remodeling a commercial, multi-family or residential structure, Supress Sound-Engineered Products reduce airborne sound and impact noise.

Supress brings walls, floors, and ceilings up to the luxury acoustical standards that today's building dwellers demand. Our products remove up to 78 or more decibels of noise from standard wall, floor and ceiling assemblies, and are available with anti-mold properties. Installing Supress products involves the same tools and procedures as installing standard drywall or plywood. Use Supress products to experience the sound-engineered difference in your environment.

- Enables superior acoustical performance with the thinnest wall assembly construction
- Up to 78 or more decibels of noise reduction
- Installs like standard products
- Available throughout North America

Our Supress product line includes:

Supress Sound-Engineered Drywall (SED)™

Our Sound-Engineered Drywall (SED) provides top-of-the-line sound and vibration absorption in a thin panel construction. No special tools or equipment are required for installation. Its non-metallic construction will not interfere with cellular phone reception, wireless controls, or wireless networks. It contains water-based materials for interior use and is fire-tested and approved. It has passed independent fire lab and field acoustic performance testing, and is available with anti-mold protection.

Use Supress Sound-Engineered Sealant around any cut-outs for electrical boxes, phone/cable jacks, or other noise intrusions. Optionally, use sealant on panel edges, floor seams and joints.

Supress Sound-Engineered Drywall is available in the following configurations:

PRODUCT	THICKNESS	LENGTHS	USES
SED1248	1/2-inch	6,8,9,10,12 ft	Great for remodeling construction and cladding over existing walls to achieve superior acoustic performance. STC rating 50-67, depending on wall assembly.
SED5848	5/8-inch	6,8,9,10,12 ft	Ideal for new construction in single-family, multi-family residential or commercial applications. STC rating 52-69, depending on wall assembly.
SED3448	3/4-inch	8 ft only	Designed for walls needing better sound suppression at low frequencies (subwoofers) such as a home theater. STC rating 54-72, depending on wall assembly.
SED4448	1-inch	8 ft only	For high-end home theatres and professional sound studios. STC rating 55-78+, depending on wall assembly.
AS287	Sound-Engineered Sealant		Use on all panel edges, joint or seams.

Supress Sound-Engineered Plywood (SEP)™

Our Sound-Engineered Plywood (SEP) product contains no metal and has tapered tongue-and-groove construction. This plywood is for new construction or easily fits over your existing subfloor to deliver superb acoustic performance. Use it to solve noise problems with hard-surface floor coverings such as hardwood, marble, stone, or vinyl tile. STC rated to 61 and IIC to 51, and available with anti-mold protection. Use Supress Sound-Engineered Sealant on any cut-outs or penetrations.

Supress Sound-Engineered Plywood is available in the following 4 x 8 ft width panels, with a square edge:

PRODUCT	THICKNESS	PANEL SIZE	USES
SEPW5848	5/8-inch	4 x 8 ft	Shear wall
SEPU5848	5/8-inch	4 x 8 ft	Floor underlayment/Remodel
SEPS3448	3/4-inch	4 x 8 ft	Subfloor/New construction
SEPS9848	1-1/8-inch	4 x 8 ft	New luxury/Commercial construction
AS287	Sound-Engineered Sealant		Use on all joints or seams.

Supress Sound-Engineered Adhesive (AS387 Drywall) (AS487 Plywood)

Our Supress Sound–Engineered Adhesive is an alternative to our Sound-Engineered Drywall and Sound-Engineered Plywood if you are using your own acoustical materials for cladding over existing surfaces.
