

SUPRESS[®]

SOUND-ENGINEERED PLYWOOD[™]

Product Features, Benefits and Advantages

- Next-generation, high-performance sound (to STC 61), impact noise (to IIC 74) and vibration absorption in a thin wood panel construction (5/8", 3/4", or 1 1/8" thick)
- Safe, non-metallic construction: Does not interfere with cellular reception, wireless network, SmartHome, or Home Theater wireless (RF) operation and equipment links
- Low labor cost: Cut with standard saws and install as regular plywood-No special tools or equipment required for installation
- Water-based materials for interior use
- Shear and subfloor grade-stamped PS-I Exposure 1/24" Span-rated
- Fire-rated
- Lab and field performance-tested

Product Description

Supress Sound-Engineered Plywood (SEP) are engineered wood products and engineered structural wood products that provide significant sound isolation and vibration absorption in standard panel sizes. Supress SEP subflooring is span-rated and designed to replace standard subflooring in single-layer or multi-layer (subfloor-underlayment) floor/ceiling assemblies utilizing either wood or metal joists. Each panel of Supress is grade-stamped PS I Exposure 1. Exposure 1 panels are suitable for uses not permanently exposed to weather. Supress subfloor products have square-cut ends and tapered tongue and grooves on the long edges.

Supress SEP is the answer to unwanted sound and noise in residential and commercial structures. Professional builders specify Supress in their multi-family projects to provide that extra level of quality in their floor/ceiling assemblies and common/demising/party walls that today's buyer's demand.

Owners of luxury residences throughout the US have used Supress to provide sound absorption in their home theaters, music rooms, children's rooms and play areas. Commercial operators use Supress in their recording studios, conference rooms, offices and in factory/warehouse areas.

How to Order:

Supress Sound-Engineered Plywood (SEP) in 4' x 8' panels[†].

<u>Product</u>	<u>Application</u>
▪ 5/8" SEPS5848	Shear Wall
▪ 5/8" SEPU5848	Floor Underlayment/ Upgrade/Remodel
▪ 3/4" SEP3448	New Construction Subfloor [‡]
▪ 1 1/8" SEPI1848	New Luxury Subfloor/Commercial Const. [‡]

[†] Square edge unless otherwise noted.

[‡] Available in Tongue and Groove construction.

SAFETY FIRST!

Follow good safety and industrial hygiene practices during handling and installation of all Supress products. Take necessary precautions and wear the appropriate personal protective equipment as required. Read material safety data sheets (MSDS) and related literature on products before transportation and/or installation.
