

SUCCESS WITH SUPRESS®

Sound-Engineered Products

August 2008 News

Southernmost Hotel, Key West, Florida.

Customer Project:

Southernmost Hotel Key West, Florida

Southernmost on the Beach is currently undergoing an exciting expansion. By the end of 2008/early 2009, there will be 80 spacious new rooms—400 square feet and larger, all with luxurious bathrooms. Of these beautiful new rooms, 13 will be oceanfront, while 48 will have ocean views.

Supress Sound-Engineered Drywall was used on all demising walls through out the building in order to reduce sound transmission between rooms.

Supress Distributor Profile:

Watson Building Supplies Ontario, Canada

Watson Building Supplies originated in Concord, Ontario, Canada in the 1980's. Today, Watson Building Supplies has four locations, based in Vaughan, Barrie, Belleville,

and Burlington. Watson participates in the drywall, insulation, steel, roofing, masonry, stucco and landscape businesses and has a division which insulates the attics of homes with blowing wool.

When asked about the relationship between Supress and Watson, President Doug Skrepnek states, "Watson has had the Supress line of products for over a year, and is excited about Supress' enthusiasm within the Canadian market. Whether it be architectural coverage, dealer network or working with developers and even home owners, Supress has made a concerted effort to build their product penetration within the province of Ontario.

I am very excited about the upcoming months and years with Supress as I believe their product is not only exciting but has a huge opportunity for growth, within not only the Canadian market but the North American market."

Supress Sound-Engineered Drywall Earns One Hour Fire Rating in UL-Equivalent Test

Supress Sound-Engineered Drywall earned a one hour fire rating in UL-equivalent test conducted in accordance with the ASTM E119 fire testing method for building construction and materials.

"This test confirms our belief that Supress Sound-Engineered Drywall not only provides superior sound suppression but is also a safe and reliable alternative to multiple layers of traditional drywall," said Bruce Donaldson, President of Supress Products, LLC.
