Customer Project: Ifshin Violins

Ifshin Violins builds violins, violas and cellos that it sells or leases to thousands of customers including solo, symphony and amateur musicians as well as vintage string instrument collectors.

Ifshin acquired a building in El Cerrito, California, razed it, and built a 15,000 square foot superstore. Ifshin faced the daunting task of isolating sound for customers from other patrons as well as the 10 technicians who work on instruments all day.

Jay understood the ability to apply modern technology to his sound challenge without compromising unnecessarily on space. After conducting extensive research, Ifshin selected Supress Products Sound-Engineered Drywall for all relevant wall surfaces in the store.

“We wanted to provide a better buying experience for our clients,” said Ifshin, who learned to play violin in his twenties in Florida. “With Supress, we have enabled our customers to go into comfortably-sized rooms and not hear noise from adjacent rooms within the store or the street outside.”

Supress Expands

Supress recently opened a second manufacturing facility in Oakland, CA. Our other plant is near Medford, OR.

Drywall Reminders

Supress Sound-Engineered drywall is available in the following thicknesses and lengths:

1/2 in	6, 8, 9, 10, 12 ft lengths	Ideal for remodel construction or cladding over existing walls to attain superior acoustic performance.
5/8 in	6, 8, 9, 10, 12 ft lengths	Great for new construction for single family, multi-family residential or commercial construction.
3/4 in	8 ft lengths only	Suited for walls needing better sound suppression at low frequencies (subwoofers) such as a home theater.
1 in	8 ft only	For the professional commercial theater.

Architect’s Table

New CEU Accredited Course

Supress Products has teamed up with McGraw-Hill to offer a new CEU accredited course titled “Sound Choices in Acoustical Drywall”. As the world lives ever closer in tight confines, next generation acoustical solutions are needed to provide quieter environments. Find out how Supress Sound-Engineered Drywall answers that call.

The Supress Online Library

Supress has complete online libraries for all of its products, installation guides as well as CAD designs for wall assemblies and floor ceiling assembly drawings. These are ready to be dropped into architectural renderings. Download options include PDF, DWG, and DXF which are available at:

www.supressproducts.com/download/index.html

In addition, our drawings are also hosted on McGraw-Hill’s Sweet Network site:
